An Empowering 3 Day Virtual Interdisciplinary Breast Center Conference

Friday, April 16 - Sunday April 18

plus 9 Post Conference Courses:

Monday, April 19

• Cutting-Edge Breast Imaging: Staying Ahead of the Curve
• Design and Development of a High-Risk Breast Program
• Clinical Breast Assessment (CBA): Updates in the Approach to Diagnostic Evaluation of Breast Abnormalities
  • Challenges and Controversies in High Risk Breast and Ovarian Cancer Management
  • Evolving Through A Pandemic: Transition from Breast Center Survival to Growth
• Technologist Challenge: Amplify Your Skills and Knowledge
  • Blueprinting the Navigator Role
  • Dr. Harold Freeman Navigation Institute Course
  • Introduction to Oncoplastic Surgery

BPNC Breast Patient Navigation Certification
CGRA® Cancer Genetics & Risk Assessment Certification
Assessment of Need

Over 250,000 women will be diagnosed with breast cancer annually, accounting for 30% of all new cancer cases in women. This makes it the most common cancer diagnosis in women. This program’s intent is to increase the quality of breast care provided to women across the globe through the interdisciplinary education of breast health professionals. Many breast healthcare practices are not standardized and this conference provides a learning and networking environment enabling breast professionals to learn about genetics, risk, the latest treatments, technologies, procedures, become certified and sharpen their skills in detecting and treating breast cancer. Treating breast cancer includes risk assessment. The conference also provides a review of selected topics throughout the field of breast health care. An analysis of peer-reviewed journal articles, new guidelines and past participant evaluation analysis have identified technical areas of focus which include the evolution of a breast center, breast specific gamma imaging, using breast MRI as a screening tool, improving RT/Radiologist relations, digital positioning, ultrasound imaging, biopsy techniques, lobular neoplasia, reverse axillary mapping, endocrine therapy, treating the breast cancer survivor, coding and reimbursement procedures. Patient centered focused areas include: providing care to the underserved communities, patient tracking tools, assessing the high risk patient, reconstruction options, starting a sexuality program in a breast center, supporting the breast cancer survivor, and patient satisfaction. In each of these areas, lectures will include controversies, recent developments and recommendations from experts in the breast health care field. This program has been developed specifically for the entire breast center team from administrative staff to breast clinicians. It is the intent of our educational activity to provide breast health care professionals objective, evidence-based clinical content, which they can incorporate into their practice to improve clinical care and outcomes of their patients.

3 Patricia A. Ganz & Erin E. Hahn et al. Implementing a Survivorship Care Plan for Patients With Breast Cancer. The Journal of Clinical Oncology, February 2008 volume 26 Number 5

You Asked, NCBC Delivered Virtually Everything!!!

Now more than ever as medical professionals we need to be on point with the development of our Breast Care Services. We know NCBC is the place you come to stay on the cutting edge, and you depend on us to deliver tools that directly impact your program development and patient outcomes. For this reason, we have a heavy focus specifically on “program development” for our 2021 conference.

If you only have time for one Breast Care Conference, the NCBC Interdisciplinary Breast Center Conference should be the one you don’t miss!!!

How-To Breast Center Program Development Courses for 2021

- Lymphedema – How to Manage a Patient with Lymphedema Sunday April 18, 10:15 am - 3:00 pm pages 8-9
- Challenges and Controversies in High Risk Breast and Ovarian Cancer Management Monday April 19, 7:50 am - 4:45 pm, page 12
- Design and Development of a High-Risk Breast Program Sunday Evening, April 18, 4:45 - 8:00 pm, page 10
- Blue Printing the Navigator Role Monday April 19, 8:00 am - 5:00 pm, page 16
- Evolving Through a Pandemic: Transition from Breast Center Survival to Growth Monday April 19 7:50 am - 4:45 pm, page 14
- Converting to Tomosynthesis Screening: Logistics & Beyond Monday April 19, 7:45 am - 5:00, page 11
- Implementing Abbreviated MRI in Clinical Practice Monday April 19, 7:45 am - 5:00, page 11
- Impact of Pathway Implementation Friday April 16, 1:30 pm - 2:00 pm, Navigation Break Out, page 6
- Crafting Survivorship Surveillance Visits to Offer Highest Value Saturday April 17, 11:40 am - 12:10 pm, Survivorship Break Out, page 7
- Focus on Multidisciplinary Conference - Identifying Quality Improvements Sunday, March 21, 4:00 pm - 4:30 pm, Quality Break Out, page 8
- Putting Together a Performa for Business Expansion in the Breast Center: What Will the CFO Need from You? Mon Apr 19, 1- 1:45 pm page14
- Building a Volunteer Program Monday April 19 11:15 am - 11:45, page 16
- Creating a Successful Support Group Monday April 19 2:30 pm- 3:00 pm, page 16

Dear Colleagues,

As President, it is my sincere honor and pleasure to welcome you to our 30th Annual Interdisciplinary Breast Center Conference. We are excited about the comprehensive program purposely designed to meet the educational needs of the entire breast team, from breast center administrators to clinical providers of care. This year’s program will deliver on state-of-the-art and current educational content from experts in breast surgery, oncology, pathology, nursing, administration, navigation, psychology and radiology, as well as sharing innovations in breast cancer care, including the NQMBC program.

We have had several successful pre and post conferences that we will be bringing back this year including, The Essential Oncoplastic Surgery Course™ and Cutting Edge Breast Imaging: Staying Ahead of the Curve, Challenges and Controversies in High Risk Breast & Ovarian Cancer Management, Design and Development a High Risk Program, and Clinical Breast Assessment (CBA): Updates in the approach to Diagnostic Evaluation of Breast Abnormalities. The Administration, Technologist Challenge: Amplify Your Skills and Knowledge and Navigation post-conferences will provide in-depth educational sessions to address the needs of our attendees.

I would like to thank the program committee and conference chair, Dr. Khai Tran for their hard work, dedication and commitment to preparing this dynamic program and including amazing speakers and presentations that will give you the tools and knowledge to bring back to your respective practices.

Warm Regards,

Sandhya Pruthi, MD, FNCBC
President, NCBC
Consultant Breast Diagnostic Clinic
Professor of Medicine
Mayo Clinic
Rochester, MN

Greetings and welcome!

NCoBC is approaching a significant milestone in 2021: it is the 30th anniversary of this amazing Annual Interdisciplinary Breast Center Conference, which continues to evolve as needed in order to stay relevant in the ever-changing landscape of breast care. I am honored to serve as this year’s conference chair, and firmly believe that it is our mission to design a conference that meets not only the needs of every expert within the breast care continuum, but also to bring new ideas and the latest thinking in every aspect of breast care, delivered to you by truly talented speakers who are well-regarded in their field. Our planning committee worked diligently to put our program together and we are indebted to these amazing guest speakers, who care enough to come and share their knowledge and experience with us.

One quick glance of the program will show that we are serious about our commitment to every expert within the multidisciplinary breast care team. More than just providing up-to-the-minute information, it is important to me that we make this information relevant to your everyday work and challenges, and give you information that is applicable to your daily practice, and pearls which you can apply as soon as you return to your clinical work. In addition to the main conference, there are a variety of post-conferences which will bring tremendous value to your patients and organization. This year, we are introducing several new topics, including a comprehensive lymphedema mini symposium, innovations in imaging technology, and the nuts and bolts of how to implement a high-risk program within your breast center. We want to show you how to do it, step by step. We continue to highlight the ever-growing importance of genetics in breast care, the evolving and critically important role of navigation, the latest oncoplastic surgical techniques, the importance of clinical breast assessment, and various relevant certification programs that are listed.

We understand that the difficult journey through breast cancer doesn’t end with the diagnosis or surgery or radiation, it’s just the beginning. This program, as a reflection of this organization and all of its passionate members, speaks to the importance of the entire continuum of care, including survivorship and beyond. We are all here for our patients and I am honored to be on your team.

With gratitude,

Khai Tran, MD
2021 NCoBC Program/Conference Chair
Breast Imaging Specialist
Sutter Health Imaging
Sacramento, CA
Core Competencies

In alignment with the CME mission of the University of Tennessee School of Medicine, programs are planned in the context of desirable physician attributes and core competencies (six abilities that are central to the practice of medicine): 1. Patient Care, 2. Medical Knowledge, 3. Practice Based Learning, 4. Interpersonal and Communication Skills, 5. Professionalism, 6. Systems Based Practice, as designated by the American Board of Medical Specialties. Core competencies addressed in each of the activity objectives below, this shall serve the best interests of the public and assist in maintenance of certification.

Objectives

- Compare current models of care to proposed models such as counseling only gene positive patients – will that be enough?
- Understand results including positives, true negatives, uninformative negatives and Variants of Uncertain Significance (VUS); understand the management of uninformative negatives and VUS
- Identify patients that might be suitable for ultrasound-guided breast cancer cryoablation
- Recognize management differences amongst patients with co-existing medical conditions; one size does not fit all.
- Critique practice choices in high risk care
- Review the data on risk sub stratification in gene positive patients and in those with familial clustering
- Formulate approaches to complex scenarios you may face in the high risk clinic
- Understand how machine learning approaches can better assess LOM by combining feature scores
- Describe how ultrasound can be used as a prognostic biomarker
- Describe the basics of CEM
- Evaluate the clinical outcomes of digital breast tomosynthesis in both screening and diagnostic breast imaging
- Discuss the patient perspective on prophylactic mastectomies
- Discuss the data on outcomes for men with breast cancer
- Identify clinical scenarios necessitating the need to perform tomosynthesis-guided, or localization
- Assess what is known about salpingectomy and delayed oophorectomy. What percentage of ovarian cancers originate solely in the ovary?
- Learn how AI might change breast imaging in the future
- Discuss the potential role (risks/benefits) of surgery in the management of women with non-BRCA mutations
- Understand tips & tricks for tomosynthesis-guided procedures
- Review data on the sensitivity and specificity of transvaginal ultrasound and CA-125 in high risk screening
- Review the differences & similarities in presentation, tumor characteristics & disease stage for men vs women with breast cancer
- Review current available wireless localization devices
- Summarize what is known about premature surgical menopause and overall health including osteoporosis, cardiovascular disease, dementia and overall survival
- Understand the basics of artificial intelligence (AI) and machine learning as it applies to breast imaging

Credit Hours

This activity has been planned and implemented in accordance with the accreditation requirements and policies of the Accreditation Council for Continuing Medical Education through the joint providership of the University of Tennessee College of Medicine and the National Consortium of Breast Centers. The University of Tennessee College of Medicine is accredited by the ACCME to provide continuing medical education for physicians.

AMA: The University of Tennessee College of Medicine designates this live activity for a maximum of 38.5+ AMA PRA Category 1 Credits™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

PA’s, NP’s and Nurses: Physician Assistants, Nurse Practitioners and Nurses may use these credit hours toward certification renewal. This credit is acceptable by the American Academy of Physician Assistants (AAPA), American Nurses Credentialing Association (ANCC) and the American Academy of Nurse Practitioners (AANP).

BRN: Credits are arranged through The California Board of Registered Nursing.

ASRT: Continuing Education Category A credits are being arranged through the American Society of Radiological Technologists (ASRT). Each 30 minutes of contact time is awarded .5 CE credit. Each contact hour is equal to 50 – 60 minutes and is awarded 1 CE credit. This program is relevant to the radiologic sciences profession.

AMA PRA Category 1 Credits™

Submit an Abstract/Poster.

NCBC Invites You and Your Breast Center Team to Submit an Abstract/Poster.

### Abstracts/Posters

You and your breast center team are invited to submit an abstract to the NCoBC’s 30th Annual Interdisciplinary Breast Center Conference, being held at the Caesars Palace Venue, Las Vegas, NV. March 19-23, 2021. The abstract/poster program provides a great opportunity to share your research and experience with other breast health care professionals. The goals of this session are to facilitate communication between breast care centers, to disseminate knowledge that may be useful to our members and their patients, and to give recognition to outstanding submissions.

To participate, email your abstract and the Abstract Application* to the NCBC office at NCBCabstracts@breastcare.org by the due date, January 4, 2021; late submissions will not be accepted. Faxed abstracts will not be accepted. Submission(s) will be peer reviewed and the abstract author(s) notified of acceptance for poster display at the 2021 Conference by the end of day, January 18, 2021. The NCoBC will host a special Poster Reception at the end of the conference day on Saturday March 20, 2021.

NCBC will invite the authors of one abstract submitted in each of the three major categories, as well as one submitted by trainee (fellows, residents, students and other trainees), one of which will be designated the Fellow/Resident/Student Award-winning abstract, to briefly present their abstracts during the Oral Abstract Presentations at the Poster Reception. Category oral abstract presenters will be awarded a monetary gift of $100. The Fellow/Resident/Student Award* recipient will receive a monetary gift of $200 and complimentary registration to the conference.

*The Abstract Application and Guidelines for the Fellow/Resident/Student Award can be found at: https://www2.breastcare.org/abstracts/

### Award Winners

**Category I - Innovative Solution to Reduce Time from Positive Breast Cancer Diagnosis to Initial Definitive Surgery**

**Category II - Chatbot-based CARE Program identifies High Risk Patients Based on Clinical and Genetic Factors at the Time of Breast imaging**

**Category III - Deregulated Gene Expression in Relation with DNA Methylation Profiles Associated with Estrogen Receptor (ER) Status and Breast Cancer Molecular Subtypes**
L. Krouche, D. Rimbaum, M. Chaffanet

Fellow Winner - The Effects of the Lifestyle, Exercise and Nutrition Study on Weight Loss Maintenance in Breast Cancer Survivors
A. Lisevick, B. Cartmel, M. Harrigan, F. Li, T. Sanft, M. Irwin

Design and Development of a High-Risk Breast Program - 3 Credits

Chairs: Teresa Heckel, MBA, FABC, FNCBC & Mary E. Frievogel, MS, CGC

Developing and implementing a High Risk Breast Program can be challenging as there is no “one size fits all” approach. A true comprehensive program requires the dedication and investment of various stakeholders with different and often divergent perspectives and values, which can make implementation seem like an uphill battle. Additionally, the lack of robust data about clinical and financial outcomes can make development of the business case difficult. Administrators and clinicians in the community setting are often grappling with what resources and investments are needed, then understanding how to pull them all together to launch a sustainable, comprehensive program. These sessions will focus on developing, justifying and operationalizing a top-notch High Risk Breast Program, and the key business considerations for planning, developing and implementing, along the care continuum. It will be applicable to administrators and clinical providers, including nurse navigators, nurse practitioners, physicians, and genetic counselors.

Challenges and Controversies in High Risk Breast and Ovarian Cancer Management - 7 Credits
Sandhya Pruthi, MD & Holly J. Pederson, MD

Identification and management of the high-risk patient is becoming increasingly challenging given complexities in testing, controversies over who should be tested and the need for a personalized approach to each patient. Different models of genetic counseling incorporating telemedicine and IT are emerging which may increase access to care. Providers need to be confident in the identification and management of both gene positive and high risk gene negative patients, including being knowledgeable about emerging technologies such as the polygenic risk score, future trends in ovarian cancer screening, new breast imaging modalities and lifestyle measures and supplements that may reduce risk. This session will address the role of risk-reducing mastectomy in the absence of highly penetrant gene mutations and recommendations for the timing and type of risk-reducing pelvic surgery. Attendees will learn the data around hormone replacement in the setting of surgical menopause and how to implement guidelines in your practice to facilitate a multidisciplinary approach in the management of individuals identified as being at increased risk. This session will address these topics comprehensively including providing an expert-led panel on the challenging types of cases that you face every day.

- Including being knowledgeable about substratification tools such as the polygenic risk score
- Attendees will review the data pertaining to hormone replacement in the setting of surgical menopause

## Evolving Through A Pandemic: Transition from Breast Center Survival to Growth - 6.5 Credits

Deborah K. Dix, MS, RN and Jane Berz, MSN, RN, FNCBC

Breast centers were dramatically impacted in 2020 regarding when and how to do business, as well as ensuring the safety of their environment for patients and employees. All health care systems are now faced with learning new ways of doing business in the midst of intense financial challenges across the organization. More than ever, administrators are experiencing the need to embrace change and find a new path of discovery through resilience and innovation. This post conference is focused on the business development of new revenue streams for breast centers and creation of new pathways of critical services for patients during and in a post-pandemic environment.

Clinical Breast Assessment (CBA): Updates in the Approach to Diagnostic Evaluation of Breast Abnormalities - 3 Credits

Belinda Zaparinuk, RT(M), BS, CBEC, FNCBC; Jennifer Gass, MD, FACS & Sandhya Pruthi, MD

Clinical breast assessment entails a comprehensive and multi pronged approach, based on symptoms and clinical criteria to evaluate breast abnormalities and diagnose breast cancer. The multidisciplinary team of experts participating in this post conference will present updates in screening and diagnostic mammogram guidelines, the role of breast health awareness and how diagnostic imaging (mammogram, ultrasound and breasts MRI) is applied when focal findings (masses, thickenings, focal pain, nipple discharge, breast pain etc.) are present. Attendees will have the opportunity to participate in interactive Clinical Cases Discussion session. There will be a Certificate of Attendance.

Breast Patient Navigator Certification

Available On line April 19th - May 1st

The Breast Patient Navigator Certification developed to set standards of achievement for the professional’s role, enhance patient safety, improve the quality of care and delivery of services, and recognize professionals who advance beyond basic knowledge in a field of specialty. The Breast Patient Navigator Certification validates the medical professional’s knowledge and performance standards through testing. Certification reflects an individual’s achievement beyond licensure requirements and a basic level of knowledge. It exhibits dedication to validating a specific set of skills to provide enhanced care and services for patients and clients through advanced competency.

Criteria for the application to test are listed below. The NCBC Breast Patient Navigation Certification Program proudly offers six types of Breast Patient Navigator Certifications: The Certified Navigator – Breast in Imaging, Management, Advocate, Clinical, Provider, or Nurse.

Certiﬁcation Eligibility Requirements:
The applicant must:

- Be a licensed medical professional and hold a valid medical license as a physician, nurse, physician assistant, social worker, radiologic technologist, radiology practitioner assistant, social worker, or advanced practice nurse OR
- Be master level prepared in a health related field; OR
- Be a lay or volunteer navigator and have taken a patient navigation course; AND
- Navigate breast patients for at least 25% of the applicants job responsibility OR
- Have supervision of breast patient navigators; AND
- Provide proof of valid license or certification (not required for those taking the Advocate examination); AND
- Pay the certiﬁcation fee of $295 registration

Certiﬁcation Eligibility Recommendation but not a Requirement:

- The applicant applying for certiﬁcation should have at least two years’ experience of navigating breast patients. This recommendation is based upon the review of the experience levels of those sitting for the exam and their passing or not passing the examination.

As soon as a person successfully enrolls for the program, an informational hand book is emailed within 7 working days. The hand book does not contain all the material the applicant should review to prepare for the examinations. To prepare for the examinations the applicant should refresh him/herself on information received during their medical professional training. The hand book contains a list of resources from which questions/answers were validated.

A passing score of 81% or better is required to become certiﬁed. If an individual does not pass the examination, he/she may sit for the examination again during the next 12 months with no additional fee.
Introduction to Oncoplastic Surgery - 3 Credits
Chair: Cary S. Kaufman, MD, FACS

For both Surgeons and Non-Surgeons: Attent this introduction to Oncoplastic Surgery

Most women with early breast cancer will survive a lifetime. Learn how we enhance their survival by improving the aesthetic appearance of their cancer surgery. Cancer surgery does not have to be disfiguring. This approach is the newest advancement in breast surgery. Find out what Oncoplastic means and how it’s modifying old techniques and improving results. This introductory series describes the development of Oncoplastic Surgery, where it fits in overall breast cancer care and several examples of the performance and benefits of Oncoplastic Surgery. After this introductory session, you may wish to come to our next Hands-on Oncoplastic Surgery Course with Lab.

Oncoplastic and More - Meet the Speaker and Q&A; Cary S. Kaufman, MD, FACS - Moderating with Sadia Khan, MD, FACS
Cancer Genetics & Risk Assessment Certification

Available on Line April 19-May 1

Cancer Genetics & Risk Assessment Certification: CGRA®

Genomic discoveries are increasingly being applied to the clinical care of the patient, particularly in the field of cancer genetics and risk assessment.

There is a need for clinicians across the spectrum of practice to acquire knowledge and competency in identifying patients at risk for cancer, including hereditary risk factors as multiple genes can mediate cancer risk across multiple sites.

NCBC’s Certification in Cancer Genetics & Risk Assessment has been developed to provide the assurance that the certified individual possesses the knowledge, skills and competency to provide cancer risk assessment services to patients and families.

Preferred candidates are physicians, advanced practice nurses, physician assistants, registered nurses or other skilled practitioners seeking to demonstrate advanced knowledge of cancer genetics, cancer risk assessment with an emphasis on comprehensive breast cancer risk assessment within their respective scope of practice.

Certification Eligibility: The applicant must:
- Be a licensed or certified health care professional with practice focus in breast health care, oncology, cancer genetics or cancer risk assessment (MD, RN, NP, PA)
- Have completed relevant focused educational courses in cancer genetics, risk assessment
- Have 2 years of experience in the field of cancer care, including cancer screening, diagnosis, management, navigation
- Complete an application process

For any questions regarding CGRA® certification please contact Executive Director NCBC Kimberly Bolin, BS, ARDMS, ARRT, RT(R)(M)
Kimberly@breastcare.org

Benefits of Virtual Conference and Registration

✔ Access to 150+ Recorded Lectures ✔ On-Demand Access for 1 year
✔ Live Interactive/Panel Discussions ✔ Credit window active for 3 weeks
✔ Live Debate and Q&A Sessions ✔ Interactive Exhibitor Sessions
✔ Live Meet the Experts Sessions ✔ Exhibitor One-on-One schedules available

Special Bonus:
✔ Virtual presentations allow you to view as many break out sessions as you are able to attend during the 3 Day Interdisciplinary Breast Center Conference.
✔ And register to attend more than one post conference course - 9 to choose from!

Register to Attend: Breastcare.org
3 Day Interdisciplinary Conference
(Friday, April 16 - Sunday, April 18, 2021)
Fees include Online Syllabus and Credits
